Functions revisited

mr.Levene

Aim: Swbat to create functions for their python projects

Do now:

With the person next to you,

1) Either define what a for loop is or define function
2) Create a function that does something for a game you play .. don't forget to call it

Aim: Swbat to create functions for their python projects

Yesterday we learned two things:

For loops & Functions

It is very rare that I introduce two coding ideas to you in one class session but you all are very advanced.

Aim: Swbat to create functions for their python projects

For loop

```
for i in range(4):
    pendown();
    forward(100);
    right(90)
    forward(100)
```

Function

```python
def makeSquare():

    Any instruction you want here

makeSquare()
```

Aim: Swbat to create functions for their python projects

We ended last class by creating our own function !

Wonderful, let me just see a few of these with you !
